

Doctorate Degree in Business Administration with specialization in Management

The doctoral program in Management is designed to provide a theoretical basis applied to enhance managerial decision making. The program encourages theoretical and applied research on the fundamental aspects of business management. It is designed to prepare students for careers in performance management, teaching and research and consulting. It encourages research and publication of articles focused on solving organizational problems. The student has the opportunity to be exposed to a variety of international management models allowing them an overview of management.
