

Bachelor's Degree in Public Health with concentration in Health Services Management

Program Total Credits

120 credits

Delivery Mode

Online

Program Description

The Bachelor of Public Health with concentration in Health Services Management prepares the students to perform successfully in primary and intermediate management in health service organizations. What distinguishes these professionals are their knowledge in the field of public health, in the field of management and integration of both fields. In this way, it will ensure the fine balance between the provision of public health services and organizational and administrative health.

Program Objectives

1. To provide the health industry in both the public and private sectors with the human resources specialized in health services management.
2. To contribute to the training of professionals capable of establishing creative and cost-effective strategies in the search for alternatives that maintain the organization in the desired levels of competence.
3. To prepare professionals with the necessary leadership that will allow them to direct the development and the improvement of the health programs in which they perform.
4. Develop professionals who have collaborative and teamwork skills that can maintain group cohesion and optimal productivity.
5. Develop professionals who have the sensitivity, commitment and dedication that allows them to establish affective and effective communication.
6. To train professionals who can compete favorably in the health employment marketplace
